av.=Mean
dev.=Std. Dev.
ab.=Abstention

1. General Observations

1.1) Staff are good at explaining things and have made the subject interesting.

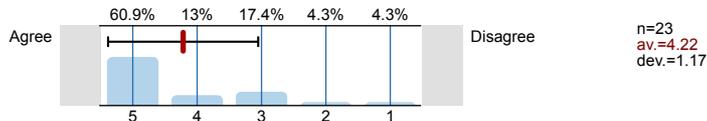

1.2) I have had opportunities to explore ideas or concepts in depth, and apply what I have learnt.

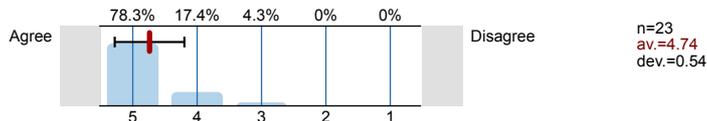

1.3) The criteria used in marking have been clear in advance.

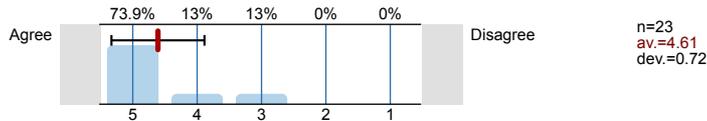

1.4) Feedback on my work has been helpful.

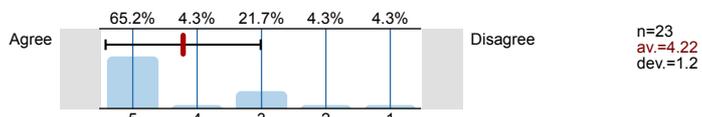

1.5) The course is well organized and running smoothly.

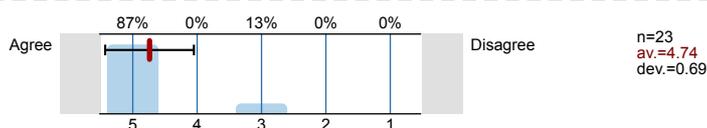

1.6) The IT resources and facilities have supported my learning well (e.g. equipment and software provided).

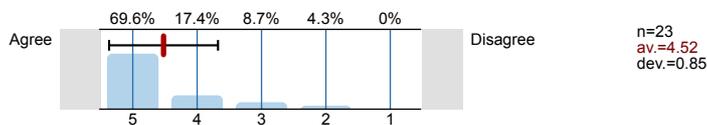

1.7) The library resources have supported my learning well (e.g. books, online services and learning spaces).

1.8) The learning materials on my course have been accessible (in class and online)

1.9) Overall, I am satisfied with this module.

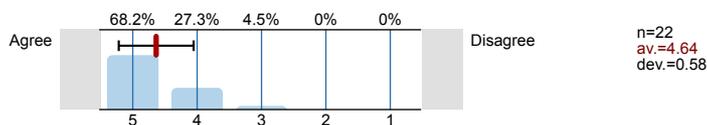

2. Additional questions about this module

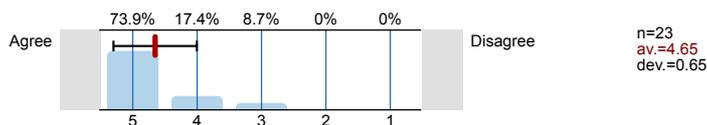

2.1) Please indicate who your seminar leader was:

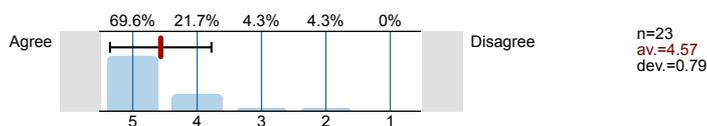

2.3) Advance information about the module was available and helpful.

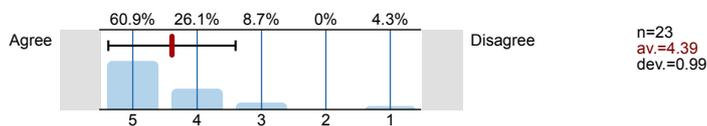

2.4) Module resources were useful for this module

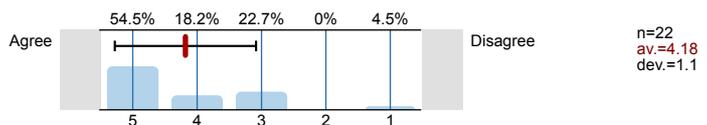

2.5) The assessment was clearly related to what I studied

2.6) The deadlines for work in this module were reasonable

2.7) Feedback on assessments has helped me to see how to improve and build on my strengths

2.8) Have you tried to download any module material from Moodle using the alternative formats? e.g. MP3, HTML, Electronic brail etc.

Comments Report

1. General Observations

1.10) Please highlight any specific examples of excellent teaching on this module.

- Amrit is an amazing lecturer, he doesn't just read off the slides. His recordings are very comprehensive and detailed.
The work he set us in seminars has been challenging but I appreciate that he wants to push us.
- Amrit was really good
- Amrit's explanation of almost every topic was clear and concise.
- Dr Amrit has been really helpful with lecture recordings and has always informed us of any changes to the module and this has helped a lot. He is very reliable with information and doesn't delay contacting us.
- How the lecturer puts out the lectures, with well and detailed explanations, especially with seminars being there to help with seminar work and ISQs.
- I think the structure of the seminars was really key to my understanding of the content for micro this term. I thought doing problem sets weekly was a really good way to learn the content and it was taught very well, especially by Yannis in the seminars. The lectures were also very well taught, in my opinion, they were not over complicated and it was definitely my smoothest module this term!
- N/a
- No specific example, I thought overall the way that Amrit went through the content in the lectures was clear and easy to follow. The examples in the slides were very helpful as it was useful to test the theoretical understanding. It also meant that when it came to the problem sets it was clear how to work out the answers. I also think it will be very useful for tests and exams as it won't be a shock to see a question laid out in a particular way. It is clear what steps of working out we should go through.
- Seminar teacher (Telma) was very helpful when I did not understand a specific concept. my seminar teacher helped going through complicated mathematical steps in a clear way that helped me understand. my lecturer also was great at explaining steps of problems.
- The lecturer will go over some material that student did not understand again at week 11 before ICT
- This module has been my favourite this term. I struggle with micro/macro more than others which may be because I did not do A-level economics however, Amrit has made this module easy to understand has explained very topic covered well. He is able to give the detailed information we need whilst also being able to explain it at a simpler level to help us build a strong foundation. This lacks in other modules.
- lectures and seminars are very to the point and well explained with good examples
- very detailed explanation of the topics. and great seminar leader

1.11) What improvements could be made to this module in the areas highlighted above?

- For the online test he said that because it would be open book that the questions would be made harder, I thought this was a bit unfair as many of us were already struggling with the content given how hard its been to learn the content purely online this year, I can understand his reasoning behind it but I just thought that the questions used in that assessment were a lot harder than any of us were expecting.
- If we were ale to create our own groups for the ISQs without having to form one within the classes we were in.
- It may have only been a problem for myself but at the beginning of the module I was very lost with the criteria. I wish we went over more complex utility functions (Cobb Douglas) in the lecturer as it made it more difficult trying to do the problem sets before the class. More time to cover seminar material.
- My breakout group within the seminar was very quiet
- N/a
- None come to mind.
- None.
- none
- spend more time going through the seminar questions instead of doing the problem set

2. Additional questions about this module

2.2) Do you have comments regarding your seminar leader?

- (my seminar leader is Yannis but he hasn't been put down as an option)
- I looked forward to attending this in person seminar as it always cleared up any issues I had with the material that week. Yidan was very helpful and I look forward to next term.
- My seminar leader was Yannis Galanakis, he was very helpful during seminars and strongly encouraged discussion between ourselves when we split up into groups, this was really helpful and helped me to not stress out as much as I found a lot of my classmates were in the same position as me
- N/a
- She was very helpful. I liked how she went through the problem sets in the seminars. Her drop-in session was also helpful and she helped me understand what I was struggling with.
- Telma has always been prepared to help us with any questions that we might have, I enjoyed her seminars very much. She is also generally likeable and approachable which makes engagement in seminars much easier. 10/10.
- They were neither of the options, I had Yannis.
- Very helpful when I had a problem. Telma was very clear at explaining problems in an easier way than previous seminar teachers I have had. Telma also linked problems to other concepts to help better our understanding.
- Yannis was my seminar leader and he was really good
- Yannis was not one of the options. I thought he taught this module in the seminars really well, he did not over complicate things and I actually enjoyed the sessions.
- Yidan sometimes seemed to use methods that were different to those used in the lectures which sometimes caused confusion.
- great explanation
- my seminar leader was Yiannis, he was amazing, so patient and explains everything so well, always in a good mood and makes the lessons so enjoyable which i think is great because i feel like we are more likely to remember the material.

2.9) Do you have any additional comments regarding this module?

- A very good module, I really enjoyed it this term. It is really good how the problem sets and seminars work. It gives a really good flow to the term as I felt that each week I was building more and more on what was learnt the previous week.
- I keep forgetting to do the weekly quizzes and I find it is hard to remember
- N/a
- No.
